📄 CARRER OBJECTIVE

Final-year IT student with hands-on experience in Python, SQL, Machine Learning, AI concepts, and Data Analytics. Skilled in data preprocessing, predictive modeling, visualization, and building AI/ML-based solutions through projects. Seeking an opportunity to apply my analytical and problem-solving skills to real-world challenges while continuously learning and contributing to data-driven business solutions.

🎓 EDUCATION

Sanjivani College of Engineering, Kopargaon, *Bachelor of Technology in Information Technology* 08/2023 – 06/2027
CGPA: 8.95 Kopargaon, India

🧠 SKILLS

Programming: Python, SQL, Java, C

Analytics & Visualization: Power BI, Matplotlib, Excel, Statistics, Exploratory Data Analysis (EDA)

Libraries: Pandas, NumPy, Scikit-learn, DAX, Flask, spaCy, Streamlit

AI & Data Science: Machine Learning, Natural Language Processing (NLP), OCR, Data Cleaning, Predictive Modeling

Tools: Power Query, Git

Key Skills: Teamwork & collaboration, Time management, Adaptability

📁 PROJECTS

AI-Powered Resume Parsing and Job Matching System

- **Technologies:** Python, Flask, OCR, NLP, spaCy, Gemini API, MySQL
- Developed an AI-driven resume parsing system to extract candidate information using OCR and NLP techniques.
- Automated the identification of skills, education, experience, and certifications from resumes.
- Implemented intelligent job matching and candidate scoring to streamline the recruitment process.

IOT Based Solar Monitoring , Automated panel Cleaning and Energy Management with real-Time Notification

Technologies: Java, C, ESP32, IoT, Machine Learning

- Designed an IoT-based smart solar system with automatic tracking and panel cleaning features.
- Implemented energy monitoring and prediction using machine learning techniques.
- Improved solar energy utilization through intelligent automation and real-time monitoring.

Healthcare Disease Risk Prediction & Patient Segmentation

Technologies: Python, Scikit-learn, XGBoost, Pandas, NumPy, Matplotlib, K-Means

- Developed a machine learning model to predict diabetes risk using Logistic Regression, Random Forest, and XGBoost.
- Implemented K-Means clustering to segment patients into risk groups for data-driven healthcare decision-making.

📜 CERTIFICATIONS

- Machine Learning [🔗](#)
- NPTEL: Employment a Lab Based Communication [🔗](#)
- Udemy Data Science Methods and Algorithms [🔗](#)
- Google Cloud Data Analytics [🔗](#)
- NPTEL: E Business [🔗](#)
- NPTEL: English for Thesis Writing [🔗](#)

ACHIEVEMENTS

Finalist Dipex, 2026

05/03/2026

Project:- IoT Based Smart Solar Tracking, Automated Panel Cleaning & Energy Management System with Real Time Monitoring

Selected Contributor, GirlScript Summer of Code-2026

Contributing to open-source projects through collaborative development and coding.

ORGANIZATIONS

Computer Society of India (CSI), *Executive Member*

08/2025

Kopargaon, India

- Assisted in organizing technical activities and student engagement initiatives.
- Improved communication, coordination, teamwork, and responsibility handling.
- Gained confidence in interacting with students, faculty, and participants during events.
